Tiered Triple Reward System  
[www.botopia.finance](http://www.botopia.finance)

JAN.2022

# What is Botopia?

Botopia is an automated investment platform based on

**ARTIFICIAL INTELLIGENCE**

In real time, it analyses more than 300 pairs for selection while also analysing multiple indicators and the cryptoassets with the most volatility, volume and profitability in the market. Thanks to this technology we are able to foresee the price trends in the market and make the most convenient, investment at the right time, thus maximizing the return.

# What do we offer?

Botopia offers a tiered user level system which allows both individuals and institutions to participate in our project, regardless of their financial capacity or their prior knowledge of investments. Our company philosophy is to offer easy access to the cryptoassets market through our investment platform without the user requiring previous experience in the financial markets. The user only needs to choose what capital to invest, what interests to earn and how often\*.

\*minimum 2 weeks (60% APR)

# Tiered Triple Reward System

Botopia offers a **unique triple reward system** in the cryptoassets market comprised of:

## ONE

### Passive Returns

Passive returns using our automated investment platform:

- **60% APR**
- **Possibility to compound every 8 hours.**

The compounded capital cannot exceed the maximum investment permitted in each TIER. If this condition is met, the excess return will be perceived as profit capital and will not be added to compound interest until TIER levels are increased.

## TWO

### Passive Reflection

Passive reflection of the intelligent contract of our token (BTOP) for access to the investment platform (2% purchases and sales). There is no need to block the tokens to prevent such reflections from occurring, but it is necessary to keep the tier equal to or higher than the one bought into in the initial investment. In the case of reducing the tier level, if there is an ongoing investment, the commission level will be increased to the current tier, the maximum allowed capital will be reduced (if applicable) leaving the remaining capital in surplus and out of the annual APR.

# THREE

## Referral Program

Referral program with 0.1% profit for each referral.

- A new user that accesses the platform with a valid referral code, will obtain the benefit of a 0.1% commission reduction when withdrawing profits.
- A user who shares their unique referral code will get 0.1% of the profit obtained from their referrals. This value can be checked online in our investment platform and can be withdrawn at any time by the user.

# BTOP Tokenomics

- Token name: **BotopiaFinance.**
  - Token symbol: **BTOP**
  - Total supply: **120,000,000**
